

Save a Little Green with Greener Building Protection

**Protection for Floors,
Walls, Corners, Doors,
Glass and Elevators**

Protect the Environment While Protecting the Building

When you need to protect floors and walls, you can't rely on cheap films, flimsy Masonite® or a thin roll of corrugate to do the job right. Professionals trust Green Dominion™ and GDoe™ floor and surface protection products to deliver unprecedented levels of protection for floors, walls, doors, elevators and workers. GDoe reduces dust, damage and cleanup, saving labor and money, *while protecting the environment*. Depending upon your project, using Green Dominion products may even help achieve LEED credits.

GDoe Floor Protection Boards™

Green Dominion has designed GDoe Floor Protection Boards as a convenient, clean, environmentally friendly floor protection solution. GDoe boards are durable, portable, non-slip recycled plastic sheets. These 100% post-consumer recycled boards offer years of re-use and can be quickly taped together using clear packing tape. GDoe boards reduce dirt, dust and cleanup and are easily loaded back onto their customized rolling A-frame cart for storage until the next job.

You'll never have to buy Masonite again.

Board Sizes

48" x 48" x 3/16"

48" x 32" x 3/16"

GDoe Vertical Protection Panels™

For a professional move or construction job with solid protection and ease of cleanup, GDoe vertical surface protection panels are a lightweight, durable improvement over cardboard. GDoe protects walls, corners, doors, glass, elevators — and any other vertical surface you wish to protect. These bendable, cut-able sheets offer two layers of protection with a fluted air cushion between. They adhere easily using double-sided tape and leave no dust, dirt or tape residue behind. At only .17 lbs. per square foot, this superior lightweight protection makes it easy to carry enough GDoe Vertical Protection Panels to cover several corridors. GDoe Vertical Protection Panels come in various precut sizes, up to 84" x 84".

Moving Toward Sustainability

“It’s about time. It makes a difference to have green products for our sustainability-minded clients. Over the past 20 years, I’ve spent tens of thousands of dollars on floor & wall protection only to have to repurchase it over and over. With GDoe, once I’ve purchased it, I have the peace of mind that it’s here to last.”

— Tom, RVP, National Commercial Relocations Service Provider

Green Dominion was founded by moving industry and facility experts who are environmentally conscious. We examined how surfaces are protected during moves and active construction, and made improvements to the entire protection process. Instead of floor and wall protection that gets used once — or even a few times, then thrown out — Green Dominion creates materials that are *already* post-consumer recycled and can be used *hundreds of times*, and then be recycled again.

Green Dominion is a U.S. company that recycles plastic here in America, saving thousands of tons of materials from the waste stream and enabling cleaner, safer job sites. The longer you use Green Dominion products, the more costs you avoid and the more you help the earth. And we put our own green in the game.

Green Dominion is committed to a greener earth — we donate 5% of pre-tax profits toward planting trees and ensuring clean drinking water.

Move Managers and Relocation Project Managers

You can use green practices to help win and retain your customers. When you work with your clients, you can represent their green initiatives with GDoe by putting green building protection in construction, furniture install or move RFPs, and specifying the use of GDoe.

Facility Managers and Building Operations Managers, IFMA and BOMA Members

You need building protection, why not make it green?

If you’re a facility manager or building operations manager, you know the challenges you face protecting and maintaining buildings when constantly relocating employees, redistributing assets, and during active construction. But you can utilize green or sustainable practices, including specifying green products to protect the property — and its inhabitants — to help keep your building competitive and desirable.

Having a reserve of GDoe products helps managers protect expensive building finishes and maintain a cleaner environment within the building during moves, maintenance or construction. Managers can specify GDoe products to be included in bids or RFPs. GDoe may also help achieve or maintain LEED credits. Some building managers even keep a ready supply of GDoe available, which they rent back to movers and contractors or otherwise use within a portfolio of properties.

Better Products that are Better for the Environment

GDoe™ is not just a better product —
it's a better way of doing things

- *Saves money* the longer you use it.
Not just ROI, but measurable soft cost savings
- *Potential LEED credits* for material reuse, solid waste diversion & better indoor air quality
- *Less cleanup* and more professional looking job sites, improving performance and safety
- *Easy installation* using a tape gun with clear packing tape
- *Reduces cost* through less sourcing, less cleanup, less labor, increased safety, fewer claims, less disposal fees
- *Eliminates* last minute supply concerns

Masonite, cardboard and carpet films are messy and offer minimal protection. GDoe provides a safe, professional protection that won't end up in the dumpster.

Try pushing a 1,000 lb. fire-proof file cabinet or a panel cart full of systems furniture work surfaces on Masonite or carpet film. GDoe handles it with ease — with no need for cleanup.

GDoe floor protection starts as commingled post-consumer HDPE, — such as consumer-recycled milk jugs — which we chop, grind into pellets, wash and dry.

Each GDoe Board diverts 24 milk jugs from the solid waste stream.

Lab and healthcare spaces can't tolerate the dust and dirt of Masonite, — GDoe doesn't generate dust. You can't power wash Masonite, but GDoe can take it!

Cardboard offers scant protection against scrapes and nicks. GDoe keeps walls, corners, doors, glass and elevators safe, averting thousands of dollars in repair costs.

	GDoe™	Masonite	Carpet Film	Ram Board
100% recyclable product	✓	✓	✓	✓
Made from 100% recycled content	✓	✓		✓
Will not chip, break or deteriorate	✓			
Resists water	✓			
Textured non-slip surface	✓			
Substantial labor, purchasing & handling savings	✓			
Continued reusability over years	✓			
Diverts material from the waste stream	✓			
Much less expensive over lifetime	✓			

100% Recycled Content, 100% Recyclable

GDoe keeps the job site clean, with no dumpsters full of waste. Unlike crushable cardboard, GDoe Vertical Protection Panels have two durable sides with fluted channels in between.

You'll never have to buy corrugated wall protection again.

“GDoe floor boards & wall protection panels handled our client’s enormous multi-phased, multiple facility office relocation covering thousands of offices over a few months. We removed & reused GDoe protection products over and over. Today, they look like the day we bought them. We love the A-frame carts. What a smooth and easy transport process.”

— Clint, Senior Project Manager, Commercial Relocations

GDoe products are made from 100% recycled material.

GDoe Protects:

- Office Buildings
- Healthcare Facilities
- Research/Scientific Facilities
- Hospitality Facilities
- Historic Properties
- Government Facilities
- Educational/Institutional Facilities
- Residential Properties
- Multi-Family Properties

GDoe Helps:

- Commercial Movers
- Residential Moving Companies
- Office Furniture Installation Companies
- All General Contractors & Sub-Contractors
- Facilities Managers/Building Operations Managers
- Relocation/Move Managers
- Clean Room Environment Contractors
- LEED Certified Building Developers

"The look, the feel and the ease of application of the GDoe products were what got me at first. The fact that the protection was perfect and did not have to be replaced or readjusted sealed the deal. At the end of my 800-office install, we easily pulled the tape off, lined them back up on their carts and rolled them away for another day. I love being more green."

— Todd, Contract Furniture Installation Project Manager

GDoe May Help Achieve LEED Credits

Your choice of GDoe products may help you achieve LEED credits for Materials and Resources, Indoor Environmental Quality, and even Innovation in Design.

As part of the Indoor Air Quality plan, specifying GDoe may help your project qualify for IEQ credits by keeping dust down, while using recycled materials that don't emit VOCs.

In addition, GDoe, by its nature, is a recycled material that can be reused again and again, which may help your project qualify for LEED MR and ID credits.

Potential LEED Credits:

Construction Waste Management

Resource Re-Use 30%

Recycled Content 10% (post-consumer + 1/2 pre-consumer)

Recycled Content 20% (post-consumer + 1/2 pre-consumer)

Regional Materials

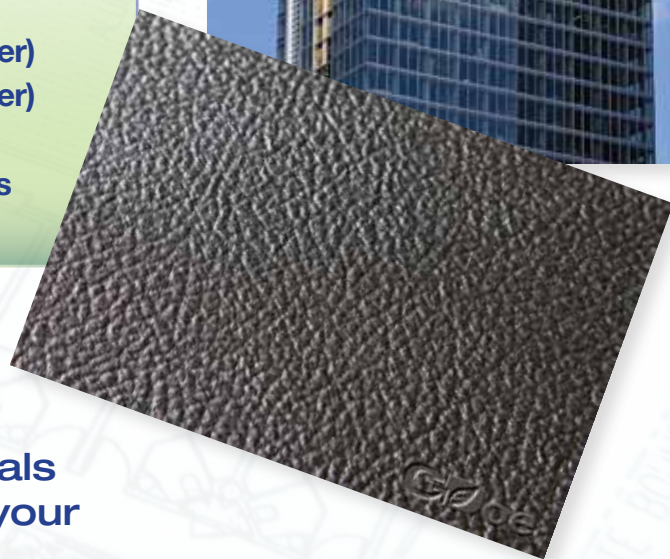

Sustainable Purchasing, Facility Alterations and Additions

Indoor Air Quality

GDoe offers the protection you need for floors and vertical surfaces.

100% Recycled Content that is 100% Recyclable. For Greener Moves and a Greener Earth.

“GDoe blows away the products we currently use. It’s a green product that’s not only superior and more durable, but also, its installation is easier and it’s much cleaner and more professional looking. A better solution and a more sustainable approach for the environment. Everyone wins.”

— Dan, General Manager, National Office Relocation Firm

Greening the Moving and Facilities Management Industry
